

Measures 4' x 5' – perfect for a wide variety of jobs. Constructed of a chain-link style galvanized mesh for a durable drag harrow that you can rely on to meet your needs.

The universal chain-style hitch allows you to attach this harrow to almost any ATV, UTV, or utility tractor for easy towing.

A front tray holds 8" cement blocks for extra weight, making this drag harrow even more versatile. The distance of the front tray can be adjusted.

The powder-coat finish and durable construction ensures that this product will resist rust and be long-lasting.
