3. Disassembly drawing of installation mode

Three way connection

Cross connection

Round tube clamp connection

The nail installation

Note: 1. Assemble all the components as shown in the picture. After the assembly is completed, cover the tarp and tie all the surrounding bands. Fix on the pipe and complete the assembly.

2. Install all bolts first and tighten them after the overall installation is completed;

3. All connectors can be drilled on the pipe fittings with a $\Phi 3$ bit first, then reamed with a $\Phi 5$ bit, and then again Install screws, which will improve the service life and product strength.
