

Inflatable Tent User Manual

1. Installation

1.1 For instructions related to using big power blower (750W/950W /1100W/1500W) to inflate the booth, refer to the picture above.

1.2 Open the zipper of the transparent door, drive the vehicle inside the booth from the clear door.

1.3 Zip up the transparent door and make sure all other zippers are securely zipped.

1.4 Start the air cycle blower(350W/330W) when beginning spray work.

1.5 The transparent exit door on the left side will help you evacuate the booth quickly in case of an accident.

2. Fixing the Booth

Picture

2.1 Use a sandbag or a nail to fix the D ring below the tubes, refer to the picture above.

2.2 Use ropes and heavy things to fix the position of the high D ring, refer to the picture above.

3. Attention

3.1 Don't use it outdoors during heavy rain or typhoons!

3.2 Please protect the booth from sharp objects, open fires, and other hazards.

3.3 Please keep the product stored in dry and well-ventilated areas when not in use.
