 Working Time:
 Mon-Fri 8:00 am to 5:00 pm

System Installation

- Vital: turn off the power switch, connect the video camera and the monitor, or the video camera and the monitor may be damaged.
- Connect camera 4-coil 3-cell box 2-monitor 1 (Pic.1)
- Turn on the power switch in the power box, the indicator light on the monitor is on, the switchboard starts.
- Install the video camera with the protective cover slightly and put it into the pipe, rotate coil to proper depth.
- Adjust LED light degree adjuster to proper light degree.
 For videotape, refer to the DVR operation details (display operation:Recording Type)
- Switch video to another large screen through video line.
- After utilization, mover the camera from the pipe carefully, take clean, soft and dry cloth to clear up it and put it back.

Picture 1

Charging

When the battery power is low, it needs charging, and the method is as below:

- Take out the battery and charger from the box.
- Connect the charger to the battery.
- Connect the charger to the alternating current of 100-240v. The red indicator means charging.
- The green indicator means finishing charging.

Notes: to make sure the battery using age longer, please recharge it timely; otherwise, it will make it can not recharged.

Attentions

- Please read the manual carefully before using it.
- Handle it carefully during operation, avoid throwing down or pressing it heavily.
- If the users disassemble or deliberately damage the machine, it will beyond the warranty.
- please keep distance from the system when charging
- After being used, turn off the display and pull out all the connection joints.
- Due to the version upgrades, if mentioned in this manual content does not accord with your machine, please refer to our machine.

Description

- Color TFT LCD Screen.
- High resolution camera,clear picture.
- Night vision.
- High quality special cable, waterproof and anti-corrosion/cold/tensile.
- 12V4500MA lithium battery.
- With sun-visor for bright environment outside
- Range of Application: Water-supply pipe, Air-conditioner pipe, Cable pipe, Pipeline vacuum system, PLUNBIN pipe, Buildings, Sunken pipe

Product Specification

Item:	parameter
Charger:	AC100-240V DC12.6V 1000MA
Battery:	Lithium battery 12V4500MA
Continuous use time for battery:	Approximate 6h
Investigation depth:	20M(selectable line length)
Material:	Fiber tube with /high intensity
Camera light source:	With high white light
Camera material:	Stainless steel
Menu languages	Multi-language
Camera picture:	Color

Instruction for Product

1 Camera (A)

- metal contact chip
- spring
- highlight white LED
- camera lens

Product Specification

Item:	parameter
Camera diameter:	23MM
With the tube diameter:	>25MM
Camera light source:	12 LED with high white light(adjustable)
Camera working voltage:	5V
Lights working voltage:	12V
Water proof:	IP68
Camera material:	stainless steel
Camera size:	120MM* 23MM
Camera protective cover parts material:	plastic-steel
Camera protective cover parts size 1:	29MM* 40MM
Camera protective cover parts size 2:	40MM* 90MM

cell box(D)

- power light
- key
- power switch
- charging connecting base
- camera connector
- power of monitor
- monitor video

(1) Startup& shutdown

- Connect all connectors (camera aviation line and monitor line); turn the power switch to ON, the power light is on.
 - Press "ON" on the keyboard, the machine starts operating under auto mode.
 - Press "L" and "R" at the same time, the machine stops.
 - Turn the power switch to "OFF", and disconnect the connectors.
- (2) Turn on the night-vision light.**
 Press "LED" on the keyboard to control the switch of night-vision of the camera. The light is on when starting up.
 Press manually and automatically
- Press "AUTO/MANU" to switch manual and auto rotation. It will be auto when starting up, the camera will rotates right under auto status.
 - Turn left. Press L under manual status, the camera turns left, press L again the camera stop.
 - Turn right. Press R under manual status, the camera turns right, press R again the camera stop
 - Rotate to specified angle. Press R under auto status to choose angle A, then press R to choose angle B, the camera rotates between A and B. Press R again to cancel the rotation and turn to auto status.
- (4) Rotation speed control**
 Press SPEED under auto status and start high-speed rotation. Press SPEED again to go back to normal speed.

3 cell box (A/B/C)

- monitor video
- power of monitor
- adjacent coil plug
- AV output
- battery indicator
- power input for charger
- light-degree adjustment for white light LED
- power switch
- power light

cell box (E)

- monitor video
- power of monitor
- camera box interface
- power input for charger
- power switch
- battery indicator
- lens switch
- power light

Camera (B)

- metal contact chip
- spring
- highlight white LED
- camera lens

Product Specification

Item:	parameter
Camera diameter:	17MM
With the tube diameter:	18-100MM
Camera light source:	6 LED with high white light(adjustable)
Camera working voltage:	5V
Lights working voltage:	12V
Water proof:	IP68
Camera material:	stainless steel
Camera size:	100MM* 17MM
Camera protective cover parts material:	metal
Camera protective cover parts size:	20MM* 25MM

Camera(C)

- highlight white LED
- camera lens

Product Specification

Item:	parameter
Camera diameter:	6.5MM
With the tube diameter:	7-30MM
Camera visual distance:	10-80MM (approximate)
Camera light source:	6 LED with high white light(adjustable)
Camera working voltage:	3.3V
Lights working voltage:	3.3V
Water proof:	no
Camera material:	stainless steel
Camera size:	45MM* 6.5MM
Camera protective cover parts material:	metal
Camera protective cover parts size:	45MM* 15MM

Camera(D)

- transparent case
- lens
- highlight night-vision
- metal contact chip

Product Specification

Item:	parameter
Camera diameter:	145MM
With the tube diameter:	>150MM
Camera light source:	LED with high white light
Camera working voltage:	12V
Lights working voltage:	12V
Water proof:	IP68
Camera size:	160MM* 94MM
Camera protective cover parts size:	170MM* 145MM

Camera(E)

Product Specification

Item:	parameter
Camera diameter:	42MM
With the tube diameter:	>45MM
Camera light source:	LED with high white light
Camera working voltage:	12V
Lights working voltage:	12V
Water proof:	IP68
Camera size:	136MM* 42MM
Camera protective cover parts size 1:	81MM* 99MM
Camera protective cover parts size 1:	54MM* 140MM
